# Newsletter 11

15th January 2021

# From Mr Chappell

Firstly thank you so much for all the positive comments that you have given us over the last week or so. Since the start of the lockdown, the importance of the St Helen's community coming together to enable our children to be 'Flying High' has been seen very clearly. We would also like to say a huge thank you to all families for trying to balance home learning alongside everything else that goes on in the home environment, including still working from home. Although it is not a 'standard newsletter week', we felt it was very important to answer a few important questions that have been raised by parents, and also give some key messages from staff, in order for us to ensure that our children can continue to be 'Flying High'. Below you will find a series of FAQs (Frequently Asked Questions) that we have tried to answer. The key thing is that if you have any concerns over anything please do not hesitate to make contact with school, either via Class Dojo or Tapestry, or by emailing the school office. Thank you for your continued support.

The St Helen's community, children, families and staff - 'Flying High - Soar on Wings Like Eagles'

# Why have you chosen to do pre-recorded lessons?

Each school has been left to decide what they feel is the best way forward for delivering remote learning. One of the main reasons behind our rationale for choosing the pre-recording of core subjects is to enable ease of

access to all families at home, with pre-recorded lessons available on a number of different devices. Having a pre-recorded session also enables families to take their time on the work and be able to spend time, pausing and rewinding the lessons. It means that children can go back to anything that they found confusing or re-watch a teacher modelling a given concept, for example watching over and over again how to do long multiplication. Having a pre-recorded video also means differentiated questions can be responded to by the children in their own time.

# Is my child expected to engage in all the learning that is being provided?

All staff members are working extremely hard in order to plan, prepare and deliver online lessons, whether pre-recorded Maths and English lessons, or live guided reading sessions. As a school we are expecting all children to engage in the lessons that they are provided with, as much as is possible. For some children this may be additional differentiated activities that are also being provided. We are monitoring all children's engagement levels and whether they are completing the work that is set for them. In the first instance, if we feel that a child is not completing the work being set, we will look to contact the parents/carers to ascertain if there are any difficulties that they may be experiencing and we will look to resolve any issues together to enable the child to complete their work.

We appreciate that the home environment and children working at home can be very difficult, so if you have any individual concerns, please do not hesitate to contact your child's class teacher. A discussion can take place about what is expected to be produced across the whole day.

For those families where the engagement levels are extremely low and this does not improve, despite a meeting with school and not reaching a suitable conclusion, a referral to the local authority EWO (Educational Welfare Officer) can be made by the school, to look at what else can be achieved in a more formal meeting.

# Why does my child need to be at the Zoom check in and check out?

The Zoom calls are important for a number of reasons. Firstly your child's teacher is really missing those children who are not in school and this is one way that relationships can continue to be developed, and so live interaction is really important for this. The morning check in also enables teachers to set up the day and inform the children what is coming up, in case there are any uncertainties about what is expected. A morning attendance register is being taken and we are monitoring which children are accessing this check in, as it enables us to see if there are any families who may need additional support.

The zoom check out is also really important as it allows the children to share the successes of the day and the teacher to again have live interaction with their class. This may enable them to talk about any key difficulties that may have been experienced or any questions that the children may want to raise. It is also a chance for the teacher to share how great the children have been, inside and outside the classroom.

If you are having difficulties for any reason around these zoom calls, please let the class teacher know.

# Could we have the same Zoom code for meetings?

A number of parents have asked that the zoom codes are kept the same for all meetings in a particular year group. For ease of access, we are looking at some classes having the same code and password for a week, before it is updated and changed for security purposes. Zoom is proving to be very popular and has been a great resource over the lockdowns. Below are some things to consider when children are on Zoom virtual lessons, especially where webcams are involved:

Children must have their name identified on the zoom call, we will not allow people into a zoom meeting with names that are unfamiliar to the class teacher. This helps us to ensure safeguarding procedures and is part of our school risk assessment for online learning for groups of children. If your family is sharing a device, the family surname is enough.

• If a staff member is holding a live session online, and there is not another member of staff available, then the meeting must be held with a parent present in the vicinity, especially in a 1:1 zoom meeting for children with an EHCP. Staff members who are live teaching a guided group will ensure there is a ratio of at least 1 adult to 3 children, and that at least one adult is within the same room as the child.

- Staff and children must wear suitable clothing, and anyone else in the household should be dressed appropriately, and be free from any other distractions.
- Computers used should be in appropriate areas, for example, not in bedrooms. Common rooms, such as the lounge, dining room, or kitchen is an appropriate area.
- Language must be professional and appropriate, including by any family members in the background.

For further details about our zoom protocols please see the school website. Please note that, as the lockdown was unplanned, consent for use on zoom will be implied by children joining the session and that you are in the vicinity of the device. By following a link sent to parents' email or class dojo you are consenting to this, and to be supervising your children.

# Do we have to upload work by 12:30pm on Class Dojo and Tapestry?

When children have completed a piece of work, we do expect them to upload their work to Class Dojo and Tapestry for staff to look at and in some cases make explicit feedback on. In the original guidance we asked for work to be uploaded by 12:30pm but please note **we do not expect** this to always happen and **we are very flexible** on when the work can be uploaded. However we would appreciate all work being **uploaded on the day** 

it was set, as this enables staff to see that it has been completed. It also enables us to measure the work that is being completed by every individual child to look at the engagement levels and to give appropriate feedback.

# I am concerned about the amount of screen time my child is having

The initial work that has been provided has, like in the vast majority of schools, been online. We appreciate that this is a lot of screen time and so we are looking at different ways of providing sessions, which enables children to have time away from the screen, such as PE or Art lessons. These may need to be delivered on a screen, but time will then be taken away from the device to complete an activity. The key thing is to build in regular breaks for the children. The time that children are taking on a piece of work will vary, but shouldn't last any longer than 1 hour. If there is a concern around this please let us know.

A note about e-safety: With the children spending more time online over this period, please can we also remind you around the importance of e-safety. Today we are also sending home a poster with 10 tips for safe home learning, but can we particularly remind parents of the need to ensure that children are working in an open space in the house, where it is possible to easily keep an eye on their learning and be available quickly should they encounter any difficulties.

# Why is a timetable given at the start of the week with only a few links? Why can we not have all the links for the whole week?

As you can imagine, the teachers are working tirelessly to ensure that they are able to teach both the critical workers' children in school, as well as providing excellent teaching and learning opportunities for children at

home. The work that is being delivered in the core subjects Maths and English, is following a very clear sequence of lessons, which provides good learning from day to day. Teachers need time to plan, prepare, record and upload these lessons (which can take a long time) as well as continue to teach children in school. This is why you will find that core lessons at the end of the week may not yet be recorded. Using assessment knowledge and looking at children's work that has been uploaded, teachers may find that a lesson has to be adapted,

Mon				ι

so will not pre-record all sessions at the beginning of the week.

#### Safeguarding

As you know, safeguarding and keeping children safe is our number one priority in school. It is very important to remember that children are using online platforms a lot more than they would possibly be doing. Please be vigilant in ensuring that your children are not accessing other areas of the internet, which may be inappropriate. All our videos are uploaded to our school YouTube page and we direct you to specific links, but it is important to still supervise your children when they are using online platforms, and for you to remind your

child of the e-safety rules that they covered as a whole school in Computing in Term 1. Please see below further links on how to keep your child safe online:

Coronavirus (COVID-19): support for parents and carers to keep children safe online

https://www.gov.uk/government/publications/coronavirus-covid-19-keeping-children-safe-online/coronaviruscovid-19-support-for-parents-and-carers-to-keep-children-safe-online

# Why are you not printing out worksheets for us to collect?

In October every child received a pack of books to use in the event of a school closure. The rationale behind this was to reduce the amount of printing parents would need to do to work at home, as we know that some families do not have access to a printer. With every member of staff either in class or recording lessons, unfortunately we do not have the capacity to print out all work sheets. This is why we have enabled the flipcharts to have the questions in and is also another reason for pre-recorded videos. For those children who we feel do need some adaptation of the curriculum this will be arranged separately.

# How long are you expecting children to work for? What is a good routine to have?

Government guidance recommends that KS1 children should be working for up to 3 hours a day and KS2 children 4 hours a day. With the timetable of lessons that we have structured we feel that more than enough lessons are provided. However, you will find a balance that will work for you at home, in your individual environment. We would urge you to speak to your child's teacher if you have worries, and we can talk to you

about some ideas around structuring and timetabling the day with lots of breaks throughout for the children. Different families will find different routines work for you and your children. Alongside this, we have attached an EFF (Education endowment foundation) document to help you plan your day.

# Could we have some Zoom 'fun' sessions?

As we become more accustomed to our timetables and find a structure to the day, staff are looking at developing more activities to help with social and communication skills. This is another reason why we are asking children to attend the zoom sessions that are already provided and we will be looking at other opportunities for the use of Zoom like a virtual playtime.

# When can I change my child's reading books?

A plan has been communicated to KS1 and Year 3 parents about children changing their banded reading book in school. This has been tried out over the last few days and we will be continuing this over the next few weeks. Like the last lockdown it is worth remembering that free Ebooks can be accessed via: https://home.oxfordowl.co.uk/reading/free-ebooks/ Please note you will need to register to access these resources. In the meantime, we would ask you to attend school at the given times to change your children's book.

Children must be reading for at least ten minutes a day. Please help support this by planning in some reading time in the day for your child(ren).

# What happens if my child is not able to access the pre-recorded learning as it is too difficult?

The pre-recorded lessons contain differentiated activities and questioning, pitched at all levels, just as it would be for children in the classroom. For those children who have an EHCP, and for those on SEN support plans with a specific need, some individual timetables and work may have been provided and individual conversations held around expectations. If you have any concerns around this, please contact your child's class teacher or email the school office with a message for Mrs Hardy SENCO or Mr Chappell.

# What happens if my child is in school on a couple of days?

The work in the core subjects will be in the sequence of work that is planned by teachers, to enable children to make good progress. This means that children who are in school will be accessing the same work that children at home will be receiving. There should not be any disruption because children who have some days in school at some at home are following the same sequence of lessons. It is therefore important that all work is completed daily, to follow the sequence of lessons. Missing a lesson will have an impact for the following day.

#### What else should we be completing?

Class teachers will also be reminding your child to complete some of the basics, such as reading every day, learning key number facts via Times Table Rockstars or Numbots. Please encourage your children to do these key things for ten minutes each day; it will all be beneficial in the long term.

#### Reviewing our provision:

It is important to understand that we are continually revising our online provision. If you have any more questions or concerns please do not hesitate to contact us. In a couple of weeks' time, we will be sending out another FAQ newsletter to cover any new questions that may have arisen. We have given lots of information

about the school lockdown and this has been put on a new page on our website and we hope you will find this useful. Please visit our school website for this information. <u>https://www.sthelensprimary.org.uk/</u>

Once again we would urge you to let us know as soon as possible if you have any difficulties with access to devices or data.
